Cyclone T VTC2-915 NGL fan sprayer

● Налично

ТЕХНИЧЕСКИ ДАННИ

Състояние	**New**
Pump	**Bertolini, 4-piston diaphragm, 184 l/min, with safety valve**
Nozzles	**Stainless-steel sprinklers with 16 twin and 8 adjustable anti-drip nozzles**
Tanks	**1,500 or 2,000 litres**
Fan	**VTC NGL Ø 900 plastic fan with air deflectors**

БЕЛЕЖКИ

The Cyclone T VTC2-915 NGL fan sprayer features a reinforced polyethylene tank with a level indicator, tanks for clean water for flushing and hand washing, as well as a sturdy, powder-coated chassis for greater durability. The Bertolini four-piston diaphragm pump, with a capacity of 184 l/min and a safety valve, is designed for high efficiency, whilst the adjustable VTC NGL Ø 900 fan with special air deflectors contributes to uniform spray distribution. Operational stability under varying conditions is ensured by a sliding axle and adjustable wheel track.
