FFSET 640 with flat springs	**orking width (m): 6.30 · Tra nsport width (m): 2.40 · Weight (kg): 3.320**

БЕЛЕЖКИ

Guttler OffSet® has been developed to work with a hydraulically adjustable FlatSpring, making it ideal for heavy, clayey soils typical of Eastern Europe. Such soils are tilled as soon as they become crum bly to prevent them from hardening. Passive-mounted machines such as this one offer greater efficiency, lower costs and less wear and tear compared to PTO-driven units. The FlatSpring can be easily deactivated, turning it into a ver satile roller for fields and lawns.
