БЕЛЕЖКИ

ALPEGO BE active harrow, a robust, versatile, fixed-rotary cultivator with a bearing mechanism
The robust and versatile BE rigid rotary cultivator is primarily designed for open fields and is constructed from high-strength steel, allowing it to be combined with the JET-A spreader-type seed drill. It is available in three working w idths ranging from 2.3 to 3 m, making it ideal for tractors with power outputs from 75 to 120 k.s.
