БЕЛЕЖКИ

he Güttler Super Maxx is a range of flexible and lightweight spring-tine harrows, available in widths from around 2.85 to almost 9 metres, designed for effective soil cultivation without a rear roller. The machine is ideal for shallow stubb le cultivation, seedbed preparation and mechanical weed control, whilst retaining valuable soil moisture and protecti ng the soil structure. Thanks to its robust spring tines with double-leaf springs, it performs excellently even in hard and dry conditions, delivering high productivity with moderate fuel consumption and the option of being coupled wi th lighter tractors.
