БЕЛЕЖКИ

AGROMA STRONG Mulcher
The STRONG is a machine designed to clear vineyards and nurseries of grass and branches, which are then turned into natural fertiliser. It features an automatic tension adjustment system and a low profile, allowing for clearing close to the roots without deviating from the tractor's path and without the risk of damaging the trees. It is characterised by perfect balance, with no vibration during operation, and cuts to a uniform height thanks to its reinforced front wheels and rear roller.
