БЕЛЕЖКИ

The SIPTEC DISCO PLUS MR T delivers excellent results in stubble cultivation, and the machines are also suitable for seedbed preparation or for levelling the soil after ploughing. The large diameter of the discs ensures deep tillage at high speed, even with large amounts of organic matter. The robust frame, minimal wear and tear, and the small number of parts requiring maintenance are among the key features that contribute to the even and intensive mixing of organic matter. The large disc diameter (Ø520 mm or Ø570 mm) ensures tillage to a depth of 12 cm at high speed, even under difficult conditions. One of the key features is the uniform and intensive mixing of organic matter.
