БЕЛЕЖКИ

TURAN garden ploughs with 2, 3, 4, 5 and 6 ploughshares, offering working depths of 7–10 inches (shallow), 11–14 inches (standard) and 16–18 inches (deep tillage). A sturdy Z-shaped frame distributes the impact during operation, protecting the plough. The plough is suitable for stony terrain with minimal plant roots, whilst the special material and flexibility of the components protect against damage when encountering obstacles.
